Suicide in Fond du Lac County: Facts and Figures

Data for this sheet was obtained from the Wisconsin Interactive Statistics on Health (WISH) data query system, the CDC's National Center for Health Statistics, the 2017 Community Health Survey, and analysis of preliminary 2017 data by members of the Destination Zero Stakeholder committee.

Suicide deaths in Fond du Lac County from 2007-2016 reflect a total of 4,292 years of potential life lost before age 65. In 2016 alone this number was 523 years.

The 2017 Community Health Survey found that 5% of respondents (approximately 5,000 county residents) had considered suicide in the previous year, up from 3% in 2014.

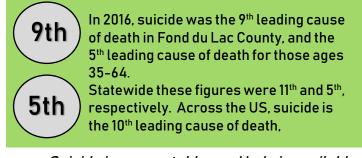

7 of the 21 individuals who died by suicide in 2017 were veterans.

Veterans comprise 8% of the county population, but 33% of the suicide deaths that year.

From 2007–2016, the number of males who died by suicide in Fond du Lac County (124) exceeded the number of females (22) by a ratio of

5.6 to 1 Statewide during that time the ratio was 3.6 to 1 Rate of death by suicide (per 100,000) in Fond du lac County exceeded the Wisconsin rate in 11 of the last 15 years, and the US rate in 12 of the years.

From 2007-2016, Fond du Lac County residents were 1.5 times more likely to die by suicide than in a motor vehicle crash.

During that same period, men ages 35-64 were 3 times more likely to die by suicide than in a motor vehicle crash.
